

[Andrew Sever](#), Co-founder & CEO at Sumsu

Andrew has been CEO at Sumsu since he co-founded the company in 2015. He leads the company's operations, business development, sales, and global expansion. Under his leadership, Sumsu has grown from a small startup to a leading full-cycle verification platform with 750+ employees, 8 international offices and 4,000+ clients across 220 countries and territories. The industries adopting Sumsu's solutions include fintech, crypto, gaming, trading, e-commerce and transportation.

Before launching Sumsu, Andrew worked as a C-suite manager at leading IT and automotive firms. He holds a degree in theoretical physics.

Andrew currently lives between London and Limassol. Outside of work, he is a keen athlete and regular Ironman and Oceanman competitor.

[Peter Sever](#), Co-founder and Chief of Strategy at [Sumsu](#)

In 2015, Peter co-founded Sumsu with his brothers Andrew and Jacob and their friend Vyacheslav Zholudev. He has played a key role in transforming the company from an identity verification startup with just a dozen employees to a global tech platform serving 2000+ businesses worldwide.

As a Chief Strategy Officer, Peter's main focus is sustaining company growth by meeting market demand and planning new product features and functionality. He is one of the main reasons Sumsu customers always get products tailored to their unique business needs.

Peter is a seasoned expert in turning strategy and vision into reality. His wealth of experience in scaling and business growth has helped Sumsu grow from a KYC provider into what it is today: the one verification platform to secure the whole user journey.

Peter's UX/UI and product development expertise is what keeps Sumsu's clients satisfied. He also helps diversify Sumsu's client portfolio to include various industries such as crypto, gambling, fintech, e-commerce, marketplaces, trading, and transportation.

Check out Peter's interview in [Authority Magazine](#), the [Bank On It podcast](#) and his articles on [Medium](#).

Peter currently lives in London, UK, where he enjoys playing tennis.

Jacob Sever, Co-founder and Chief of Innovation at Sumsub

In 2015, Jacob co-founded Sumsub with his brothers Andrew and Peter and their friend Vyacheslav Zholudev. He is a key driver of growth at Sumsub, which now works with 2,000+ clients in 220+ countries and territories, with a client portfolio ranging from fintech to e-commerce and car-sharing services.

As Chief of Innovation at Sumsub, Jacob is responsible for delivering top-notch products and driving innovation ahead of the market. Jacob brings a wealth of data-driven market insights to the table, helping businesses handle compliance, anti-fraud, and verification challenges with innovative solutions and expert support.

Jacob's areas of expertise include blockchain, Web3, crypto, ID verification, product development, anti-fraud and regulatory compliance.

Before co-founding Sumsub, Jacob excelled as a C-suite manager in the fields of product design, animation, and computer graphics. This granted him a profound understanding of how digital images can be modified and manipulated, along with insights into innovative solutions that combat such fraud. As the Chief Innovation Officer at Sumsub, he now applies these skills on a daily basis.

Jacob's has been featured by Cointelegraph in "[Web3: Marketing Buzz or Tech Revolution](#)" (2022). You can also read his articles in [Forbes](#), [HackerNoon](#), [The Entrepreneur](#) and [FinTech Futures](#).

Jacob currently lives in London, UK. He enjoys sailing and windsurfing.

Vyacheslav Zholudev, Co-founder and CTO at Sumsub

Vyacheslav is the co-founder and CTO at Sumsub, a full-cycle verification platform to secure the whole user journey. He brings unparalleled technical and entrepreneurial acumen to help Sumsub's development team reach complex goals effectively. Vyacheslav holds a Ph.D. in Computer Science from Jacobs University (Germany), with experience working as a solution architect at ResearchGate.

Vyacheslav has been interviewed for [Dojo Live](#), [Biometric Update](#), [Tech Wire Asia](#), featured in [Dark Reading](#), as well as [Impact AI](#) and the [State of Identity](#) podcasts.

He is an expert in privacy protection, ID verification trends, digital fraud prevention and international regulatory compliance regarding personal data.

Vyacheslav lives in Berlin, Germany.
